

Rainforest Classroom News

June recap:

We began our first summer unit in Australia and learned the difference between Australia the country and Australia the continent.

They also learned about its landmarks, animals, and culture. They made a watercolor painting of 'Uluru' (Australia's famous red rock) and the map of Australia. The Aboriginal dot painting of the crocodile was also a highlight of the month. The dads appreciated this art combined with the watercolor painting of Mt. Fuji for Father's Day.

Our fun week was exciting for the children with all the field trips and water play. The best part was the "Field Trips to 'Children's Museum' and 'Sea Quest'".

July Newsletter: **The school will be closed on 7/4 & 7/5**

This month we will study about, solar system, layers of the Earth, dinosaurs, and volcanoes. The children usually love this unit because the big reptiles that roamed the Earth are fascinating and everyone is also curious about outer space. We will find out how our beautiful planet came to be and what makes it so unique.

July Birthdays:

Ibrahim Nora and Srishti
