

# Redwoods Classroom

## August recap:

In August, our learning focused on the themes "Back to School," "Myself," and classroom rules. We enjoyed reading stories such as *First Day of School* and *Classroom Rules*, which helped us understand expectations and routines. The children were also introduced to the globe, where they began learning about the continents. Throughout the month, we consistently practiced and reinforced our classroom rules to build a positive and respectful learning environment.

## September news:

In September, we will continue exploring the theme "Myself." Alongside this, children will practice writing their own names, as well as the name of their school, city, and state. They will also begin to learn interesting facts about the United States.

As the days grow shorter and nights become longer, we will discuss the **Autumn Equinox** and its significance. During fall, children will discover how leaves change color and learn about the process of **photosynthesis**. They will also explore how apples grow—from seeds planted in the soil to trees nourished by sunlight. In addition, they will study the parts of an apple and have the opportunity to taste different apple varieties.

To foster intergenerational connections, we will celebrate **Grandparents Day** on September 5th.

**Dates to Remember:** September 1<sup>st</sup> : School closed for Labor Day

# REDWOODS CLASSROOM

Theme: North America

Month : September 2025

Monday	Tuesday	Wednesday	Thursday	Friday
1 School closed	2 Talking about "Myself" Name of school, city and state	3 Writing the names of city and state	4 Introduce North America	5 Painting/ Grandparents Day
