

Seedlings-Infants

April Newsletter 2026

March Recap

During the month of March, we celebrated Dr. Seuss's birthday with fun projects and engaging books that helped bring his stories to life. We also celebrated St. Patrick's Day and explored the color green through various activities.

This month, we introduced new sign language words, including "wind" and "book." The children especially enjoyed our water coloring and pouring activities, which supported their sensory and fine motor development. Stacking cups was a favorite activity, encouraging problem-solving and coordination skills.

April News

As we welcome the month of April, our classroom will begin learning how to care for plants by watering and nurturing our classroom greenery. This hands-on experience will help introduce responsibility and an appreciation for nature.

Our song of the month will be "*Here Comes Peter Cottontail*," bringing a fun and festive springtime spirit into our daily routine.

We have many exciting sensory and art activities planned, including feeling flower petals, water pouring, and scooping. The children will also enjoy a variety of spring-themed art projects such as creating clouds and flowers.

During circle time, we will read *Springtime* and explore the changes that come with the new season. When we go outside, we will observe the beautiful transformation of spring as colors begin to bloom all around us.

To celebrate Easter, the children will participate in fun activities like hopping like bunnies and making bunny hats. Our Easter celebration will take place on April 3rd, where the children will enjoy an egg hunt on the playground.

We encourage parents to bring a small classroom plant on April 16th so the children can continue learning how to care for and nurture living things.

Dates to remember

April 3rd Easter celebration

April 16 Bring a small classroom plant

Seedlings Classroom Lesson Plan
Month: April, 2026

Monday	Tuesday	Wednesday	Thursday	Friday
