

Seedling class Newsletter 2026

July Recap

What a fun-filled month we had in July! Our little learners enjoyed an exciting summer full of laughter, exploration, and hands-on learning. We celebrated **Independence Day** and had a wonderful time talking about the holiday before our school closure.

This month, we explored the amazing world of **dinosaurs**! The children loved listening to dinosaur stories, making dinosaur-themed art, and participating in exciting activities. One of their favorite sensory experiences was exploring the properties of ice as it melted. We also had lots of fun outdoors with **water table play**, a **summer obstacle course** that encouraged movement and balance, and **block-building activities** that inspired creativity and teamwork

August News

We are wrapping up an amazing summer filled with big smiles, messy hands, exciting discoveries, and wonderful milestones! This month, we will be learning all about **household pets**, the sounds they make, and how we can be kind and gentle with our furry and feathered friends through songs, stories, and playful activities.

We also have lots of fun planned with **sensory play days** and creative **art projects** that will encourage curiosity, imagination, and hands-on learning. As we welcome new friends into our classroom, we'll be focusing on building friendships, practicing kindness, and helping everyone feel safe, happy, and included.
